

Ashish Kumar

Web Developer

WORK EXPERIENCE

Projects

Frendz (Currently in Beta)

Frendz is a social platform where users can share thoughts, like and comment in real-time, and connect with others. The project is in beta, with core features live and several advanced updates planned.

As a Full-Stack Developer, I built the post-creation system using Next.js, React, and Tailwind CSS, ensuring a smooth experience. I integrated real-time likes and comments with WebSockets and implemented Clerk authentication for secure login.

Other features include user profiles, search functionality, and delete confirmation dialogs. Future updates will introduce image uploads, notifications, and enhanced search filtering.

Product Listing Site

Product List is a full-stack application that allows users to create, view, edit, and delete products seamlessly. Built with Node.js, Express, and MongoDB on the backend and React with Chakra UI on the frontend, it offers a clean and responsive interface for managing products.

As a Full-Stack Developer, I built the backend API using Express and MongoDB, handling product creation, retrieval, and deletion. On the frontend, I implemented state management with Zustand and designed an intuitive UI using Chakra UI.

Other features include a RESTful API, responsive design, and a streamlined development workflow. Future improvements may include authentication, image uploads, and advanced filtering.

Personal Portfolio

A fully responsive and interactive portfolio showcasing my projects, skills, and experience as a Full-Stack Developer. Designed to highlight my work while ensuring a seamless user experience across devices.

Built using Next.js, React, and Tailwind CSS, the site features smooth animations with Framer Motion, optimized performance for fast loading, and a clean, modern UI. Integrated React Router for navigation and dynamic content rendering to ensure scalability.

Other key features include a contact form with validation, a project showcase section, and GitHub integration for real-time project updates. Future updates will introduce blog functionality, more interactive UI components, and enhanced accessibility.

SKILLS

Languages:

- JavaScript,
- python
- JSON
- Html
- CSS
- TypeScript

Libraries and Frameworks:

- React
- Node.js
- Next.js
- express
- MongooseJS.

Development Software:

- Git command
- VS code

Languages:

- English (conversational – above intermediate)
- Hindi (Native)

EDUCATION

Sagar institute of research and technology

Electronics and Communication with
Strong focus on Programming
Bhopal, Madhya Pradesh
2022 - 2026

OTHER

- Web Developer
- DSA with Python – intermediate
-
